

Information on bisphenol A

Recent health concerns have arisen with regards to bisphenol A in "plastic" containers. ***Not all plastic is the same!*** Since 1974 **PET** (**P**oly **E**thylene **T**erephthalate) has been widely used to safely and conveniently package food and beverages.

PET CONTAINS NO bisphenol A

(DevTech Labs, Inc. and Preforms Plus, Inc.) specializes in the design and manufacture of PET preforms bottles and containers which contain **NO bisphenol A** and never have. Our products are safely utilized in food and beverage packaging which is 100% re-cycleable and ideally suited for the active lifestyle.
